1. EXECUTIVE SUMMARY

This document outlines the enhancements introduced with the goAML V5.4 system upgrade reflecting the recent system enhancements and new features introduced. The upgrade is necessary as the supplier of the platform, the United Nations Office on Drugs and Crime (UNODC) will only be able to provide support on their upgraded system and not the older version that the FIC is currently using. This transition is essential to ensure continued technical support and system reliability. Version 5.4 introduces several enhancements aimed at improving user experience and system functionality. These include an updated user interface with a new look and feel, replacement of certain free text fields with dropdown menus to enhance data consistency, and optimisation of dropdown lists for greater efficiency. These improvements are expected to streamline operations and align the system with current support standards

2. OBJECTIVE OF THIS USER GUIDE

The objective of this user guide is to define and outline the steps to be followed when an accountable institution submits a Cash Threshold Report (CTR) to the Financial Intelligence Centre (the FIC) in terms of section 28 of the Financial Intelligence Centre Act, 2001 (Act 38 of 2001) (FIC Act). Please note that the reporter must be registered with the FIC in order to access the FIC's registration and reporting platform. To register, accountable institutions can refer to public compliance communication (PCC) 05D (PCC05D) for further guidance. This user guide is applicable to:

- Accountable institutions listed in Schedule 1 to the FIC Act

This user guide is not issued in terms of section 4(c) of the FIC Act and is therefore not formal guidance issued by the FIC.

Access to the registration platform

In order to submit a TFAR to the FIC, the accountable institution must access the registration and reporting platform provided by the FIC for this purpose on the FIC's website at **www.fic.gov.za**

3. DEFINITIONS

Administrator/ CO/ MLRO	Refers to the Compliance Officer and Money Laundering Reporting Officer obliged to register and submit a report on behalf of the entity.
Authorised dealers	Refers to authorised dealers in foreign exchange (Item 19 of Schedule 1 to the FIC Act).
Authorised dealers with limited authority	Refers to authorised dealers in foreign exchange with limited authority (Item 19 of Schedule 1 to the FIC Act).
Business	Refers to an organisation, institution, or entity (ies) and can be used interchangeably.
Financial Intelligence Centre Act	Refers to the Financial Intelligence Centre Act, 2001 (Act No 38 of 2001).
Financial Service Providers	Refers to the entities authorised under the Financial Advisory and Intermediary Services (FAIS) Act to offer financial advice or intermediary services. In terms of regulatory compliance: All FSPs are subject to the provisions of the FAIS Act. FSPs are listed as accountable institutions under Schedule 1, Item 12 of the Financial Intelligence Centre Act (FIC Act). Only a specific subset of FSPs, those involved in cross-border financial transactions, have a direct reporting dispensation under the Exchange Control Regulations.
goAML	Refers to the integrated software solution implemented by the FIC as its preferred ICT platform for registration, reporting, data collection, analysis, case management and secure communications required for the FIC's daily operational functions and requirements.
Individual reporter	Refers to a natural person who acquires user credentials in order to file a report in terms of Section 29 of the FIC Act in their own personal capacity.
My Client	Client of the accountable institution
Not My Client	Not the Client of the accountable institution

Party type	Refers to the source and destination party in relation to the report (Cash Threshold) being reported to the FIC.
Postbank	Refers to Item 14 of Schedule 1 to the Financial Intelligence Centre Act, 2001 (Act 38 of 2001) (FIC Act).
Regulations	Refer to the Money Laundering and Terrorist Financing Control Regulations made in terms of section 77 of the FIC Act and promulgated in Government Notice 1595 of 20 December 2002 as amended.

Important information to remember when reporting on the FIC's reporting platform:

1. Please refer to the registration guideline for accountable institutions and PCC05D for registration-related information.
2. It is mandatory on the goAML system, that all fields marked with an asterisk (*), be completed.
3. All first letters must be capitalised.
4. All fields on the regulatory report, that are not obtained during the course of establishing a particular person's identity or conducting a particular transaction, but should be obtained as part of commercial practice, should be completed with as much of the information as readily available. In an instance where the reporting institution does not have information readily available, they are to populate mandatory fields with "not obtained".
5. The FIC does not accept any regulatory reports submitted unless if it was submitted on the goAML system. Regulatory reports must accordingly be submitted in the prescribed format and timeframes. Failure to submit regulatory reports within the prescribed timeframes constitutes a finding of non-compliance in terms of the Financial Intelligence, 2001 (Act 38 of 2001) (FIC Act).

4. INTRODUCTION

Accountable institutions have an obligation to submit cash threshold reports to the FIC in terms of section 28 of the Financial Intelligence Centre Act, 2001 (Act 38 of 2001) (FIC Act) and must utilise the goAML platform to do so.

The obligation to report in terms of section 28 of the FIC Act arises when a transaction is concluded in cash and that transaction amount exceeds the prescribed threshold of R49 999, 99, in the following instances:

- is paid by the accountable institution to the client, or to a person acting on behalf of the client, or to a person on whose behalf the client is acting; or
- is received by the accountable institution from the client, or from a person acting on behalf of the client, or to a person on whose behalf the client is acting

Cash is defined in Section 1 of the FIC Act as:

coin and paper money of the Republic or of another country that is designated as legal tender and that circulates as, and is customarily used and accepted as, a medium of exchange in the country of issue, and travellers' cheques.

The goAML platform may be accessed via the FIC website, www.fic.gov.za under the "Register or Report" functionality.

5. goAML WEB ICONS

Icons	Description
Cancel	**Cancel -** Directs the system to disregard the entered details and not save them
	Preview - Verify content before taking action e.g downloading or approving
	Print - To produce physical copies of digital content
	Print Single Page - This focuses on printing only the currently viewed page
	Export PDF – Export the data into PDF format
Refresh	**Refresh** - update or reload the content on a screen
	Delete – Delete the uploaded document

+	**Add File Attachment** – Allows users to upload or link a file to a form
Save report	**Save** - Allows users to save the captured report details
Submit report	**Submit** – Submit the captured details of the report
Attachments	**Shows the number of attached documents**
New Reports	**Upload XML and web reports**

6. CASH THRESHOLD REPORT BASELINE SCENARIO

The process flow diagram below demonstrates the end-to-end process for uploading a CTR. This diagram is given in greater detail in the content below. Fields in the flow diagram are labelled A to G.

Example used for this process flow:

Baseline scenario refers to how a CTR should be uploaded for a cash withdrawal of R50 000 at Bank A, branch Y on the goAML platform 3.1 Field Definitions

- **Report type (A)** – The type of report (i.e. CTR)
- **Reporting Person and Location (B**)
  - Reporting Person - Linked to the logged in user details, this is the person uploading the CTR. The Reporting person's information are hidden from view
  - Location - Describes the actual geographical area / branch where the transaction or series of transactions occurred. The address of the logged in user is populated in the selected report for capturing. **The logged in user must edit or delete the address, if the populated address is not the actual location of where the transaction (series of transactions) occurred.**
- **Indicators (C)** – Indicators are used to specify the nature or type of report that the institution is submitting to the FIC. The institution is required to review the list of predetermined indicators and select the most appropriate explanation(s).
- **Transactions (D)** - Transaction refers to a transaction concluded between a client and an accountable institution or reporting institution in accordance with the type of business carried on by that institution. In the event of a series of transactions, each transaction needs to be listed separately on the CTR form.
- **From Type / To Type (E)** –This indicates where the funds originated (From), and to where the funds were placed (To). Both fields are required to be completed
- **My client / Not my client and Conductor (F)** – Denotes if the '**From/ To'** type selected, is the institution's client, or not the institution's client. i.e. The person/entity who paid the cash is not the client of the institution, and the person/entity receiving the cash is the client of the institution
- **Person / Entity / Account (G)**
  - Person - Refers to a natural person. If a person physically receives or pays cash, 'person' is selected

- Entity- Refers to a legal person. Note that there is a natural person that will always be linked to an entity (i.e. the director). If an entity physically receives or pays cash, 'entity' is selected
- Account - Refers to an account held with an accountable institution (e.g. Cheque account held with a bank) Note that there is a natural person that will always be linked to an account (i.e. the signatory) and there may be a legal person (including at least one director) linked to an account. When cash is deposited or withdrawn To/From an account, then 'account' will be selected

- **Mandatory Fields (H)** – Refers to the fields that are compulsory to be completed. The information that is required is dependent on the fields selected in field G (i.e. Person / Entity / Account).

7. ACCESSING GOAML

Accountable institutions can access the goAML platform by utilising the username and password captured during the registration process. Authentication will always be required before gaining access to goAML.

Access goAML EE page by clicking the link: https://goweb.fic.gov.za/goAMLWeb_PRD.

- Click on the Login button
- Enter your username in the standard format captured during registration

Authenticating with two factor authentication

- **Step 1:** Download the Microsoft / Google Authenticator application on your mobile device
- **Step 2:** Click on goAML login page
- **Step 3:** Enter your username and password in the standard format captured during registration and click **'LOGIN'.**

Login Window

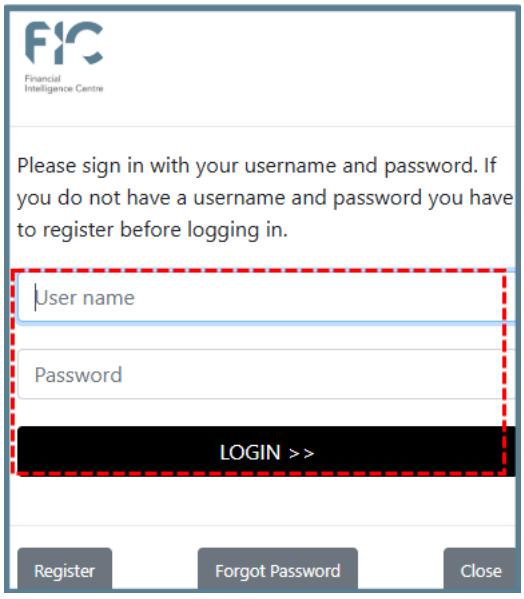

Figure 1: Login page

A QR code authentication page will be displayed as shown in figure 2 below.

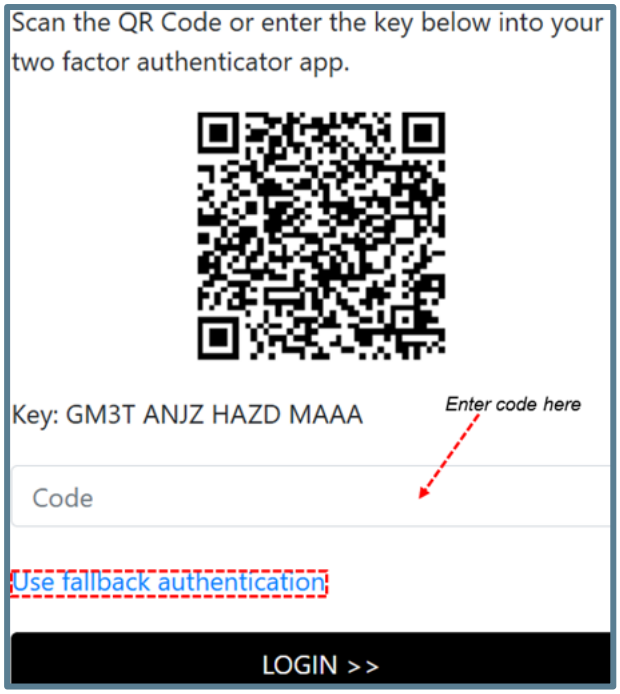

Figure 2: QR Authentication page

- **Step 4 (Option 1)**: Open the authenticator app on your mobile device and scan the QR code
- **Step 5**: Enter the time-based code displayed from the goAML shortcut in the code field
- **(Option 2): Or use fallback authentication:**
- Click on '**Use Fall back authentication'** option in **figure 2** to receive a code via e-mail, enter the code and login. Please note that the code remains valid for five minutes. Once the time elapses, select '**Use fallback authentication**' to generate a new code.

Figure 3: Authentication screen

8. goAML PLATFORM LANDING PAGE

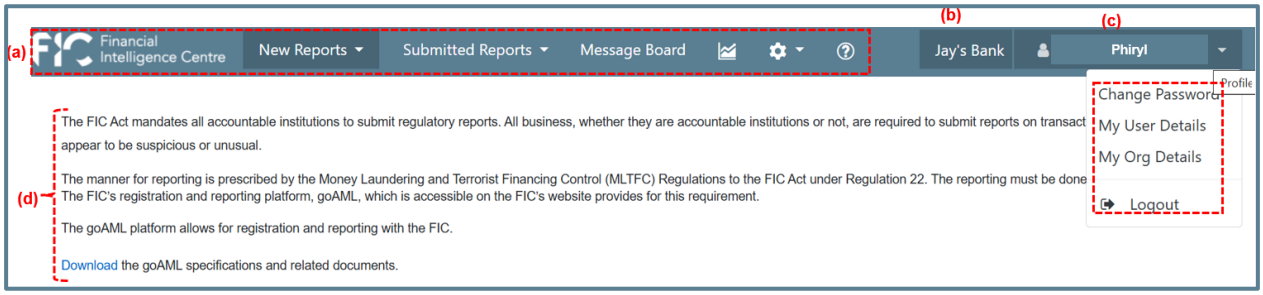

Figure 4: goAML landing page

The landing page has the following visible items

- **Menu Bar** - Contains New Reports / Submitted Reports / Message Board / Statistics / Admin / Help. Clicking any of the link items will give a user access to the functionality required. **(a)**
- **Logged in user details** - Displays the details of the authenticated user e.g. username and associated entity name. The user profile allows you to change Password, My User Details, My Org Details and Logout as a user. **(b, c)**
- **Information Bar** - Contains the FIC information with links to download goAML documentation. **(d)**

BASELINE SCENARIO FIELD A – REPORT TYPE

9. CAPTURING A CASH THRESHOLD REPORT

To capture a CTR, select **New Reports** in the menu bar, and click on **Web Reports**

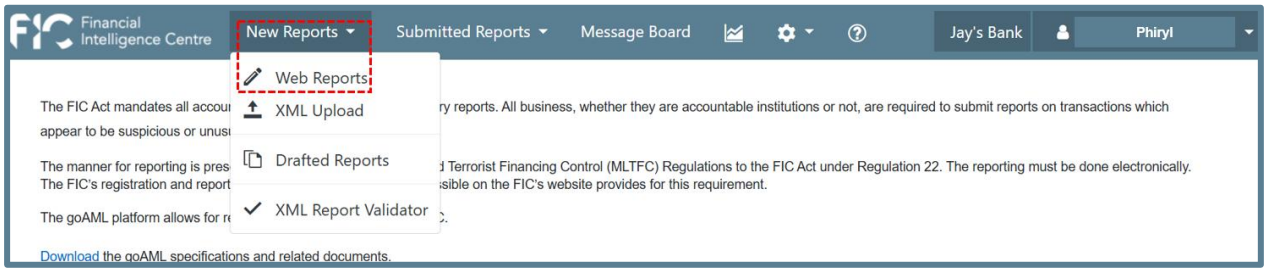

Figure 5: goAML menu bar

The types of report selection will display all the report types. Select Cash Threshold Report (CTR) and click **'Create Report'** button as shown below in figure 6. Each report contains distinct fields, for example, transactional reports will have different fields compared to activity reports.

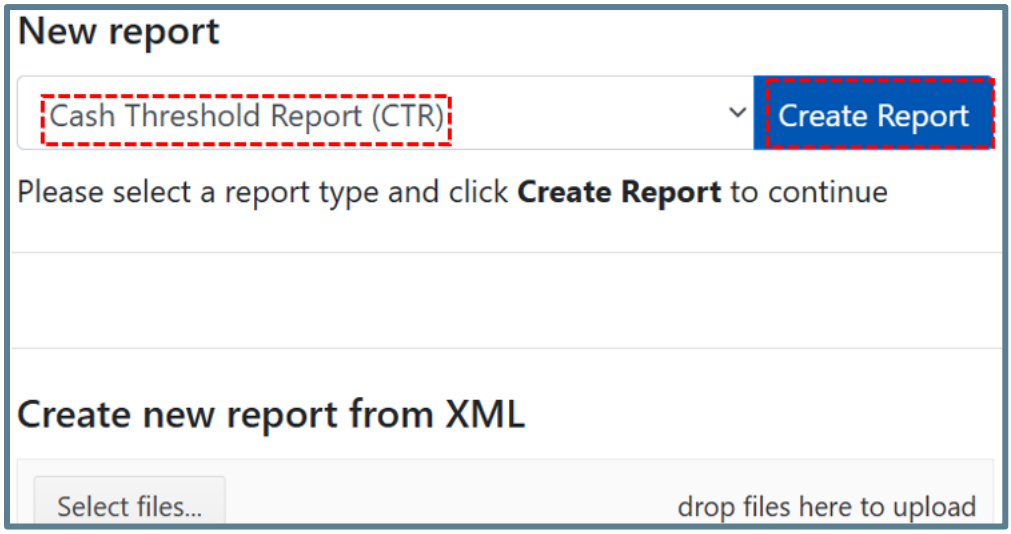

Figure 6: Report type selection interface

After selection, the Cash Threshold Report window will populate with the following fields:

9.1 Report headers

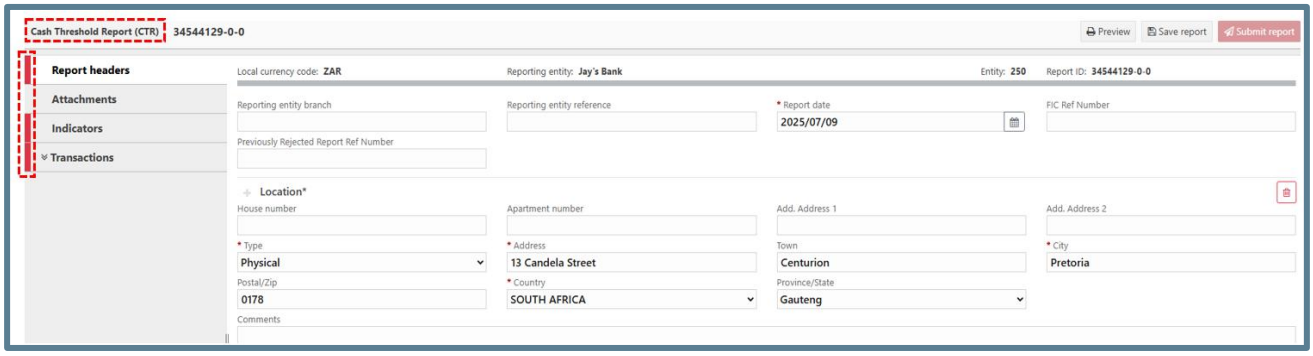

Figure 7: Cash Threshold Report

Click on each tab on the left to complete its section. When all sections are completed, the **red indicator bar** will turn green, allowing user to submit the registration form.

BASELINE SCENARIO FIELD B – REPORTING PERSON AND LOCATION

9.1.1 Reporting Person

The Reporting Person's details are linked to the current logged-in user's details

- Reporting entity branch: Branch that is submitting the report to the FIC
- Reporting entity reference: A unique code or identifier for the reporting entity
- Report Date: Automatically generated with the (current) date that the report has been submitted
- FIC Ref Number: This field is for resubmitting/ remediating previously **failed** reports and needs to reference the original report number issued by the FIC

- Previously Rejected Report Ref Number: This field is for resubmitting/ remediating previously **rejected** reports and needs to reference the original report number issued by the FIC.

9.1.2 Location

Refers to the physical address of the reporting entity (e.g., branch or office) / person submitting the report.

Editing the location

The address of the logged in user is populated in the selected report for capturing. The logged in user must edit or delete the address, if the populated address is not the actual location of the reporting entity/individual.

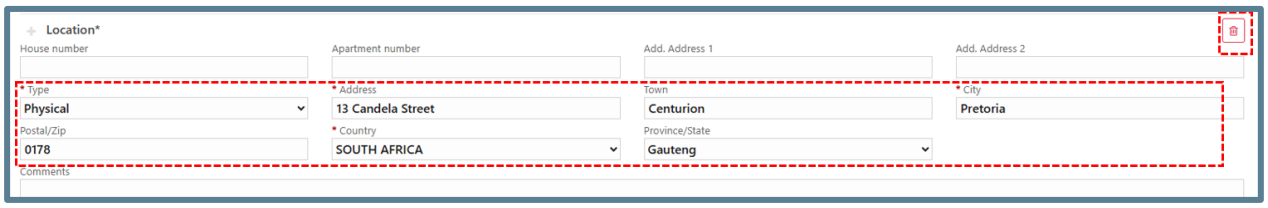

Figure 8: Location screen

The user can delete the address details by clicking the delete icon in figure 8 and then enter the reporting individual's current location at the time of reporting.

- House Number: Specifies the numeric or alphanumeric identifier assigned to a building within a street or complex. This field helps pinpoint the exact location of the property where the reporting entity/individual is situated.
- Apartment Number: Indicates the specific unit or flat within a multi-unit building associated with the reporting entity/individual. This is essential for identifying the precise sub-location within a larger property.
- Address: Represents the full physical location of the reporting entity/individual. This may include street name, house number, apartment number, and other relevant details.
- Address 1: Primary line of the address, including the street name and house number.
- Address 2: Secondary line of the address, used for additional location details such as building name, floor number, or complex name.
- Type: Defines the category of the address provided. It may refer to a business, physical, postal, or private address.
- Town: Specifies the town or municipality of the reporting entity/individual.

- City / Zip: Indicates the city and corresponding postal code relevant to the reporting entity/individual.

9.2 Attachments

This section allows the user to upload supporting documents related to the report. While document attachment is available, it is not mandatory.

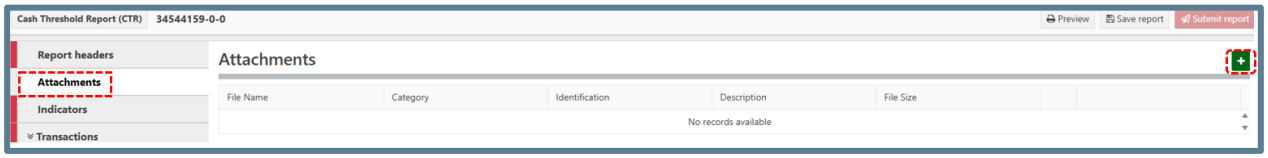

Figure 9: Attachments screen

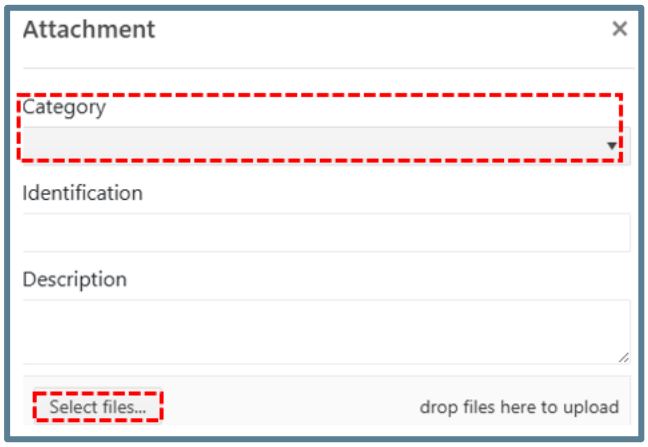
To upload a document: Click the **'add'** icon , then choose the appropriate document category from the **dropdown menu**. Complete the **identification** and **description** fields, select the files you wish to attach from their location, and click **'open'** to upload.



The document will be attached under the **'Attachments'** tab.

BASELINE SCENARIO FIELD C – INDICATORS

9.3 Indicators

Report indicators classify the type of report being submitted.

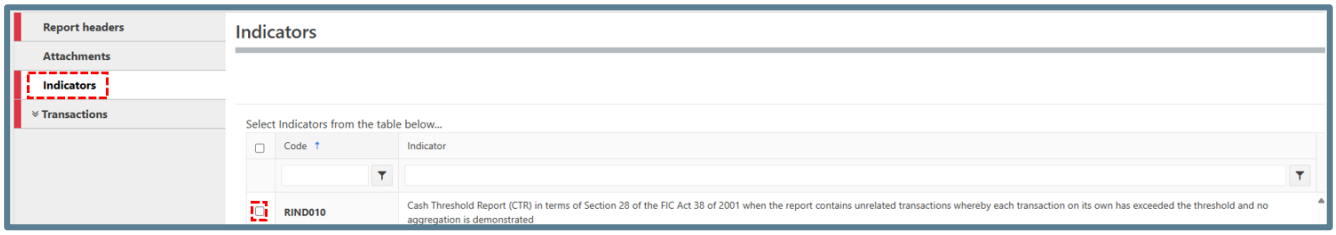


Figure 10: Indicators screen

For the Cash Threshold Report (CTR), only one indicator is displayed. To apply the indicator, tick the checkbox for the **indicator** applicable to the CTR report.

9.4 *Transactions landing screen*

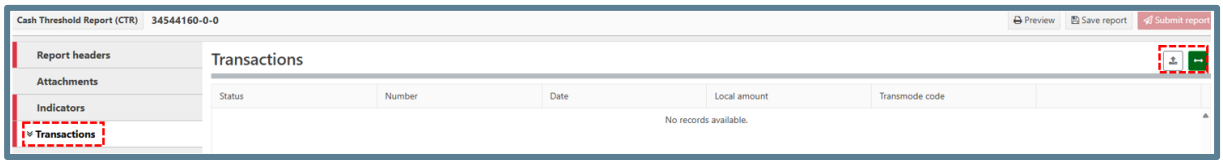

Figure 11: Transactions landing screen

To add the parties involved in the transactions click the **'Add BiParty'** icon as shown in figure 11 above. The **Transactions** screen will load as shown below in figure 12.

BASELINE SCENARIO FIELD D – TRANSACTIONS

9.4.1 Transactions

Transactions means a transaction concluded between a client and an accountable institution in accordance with the type of business carried on by that institution.

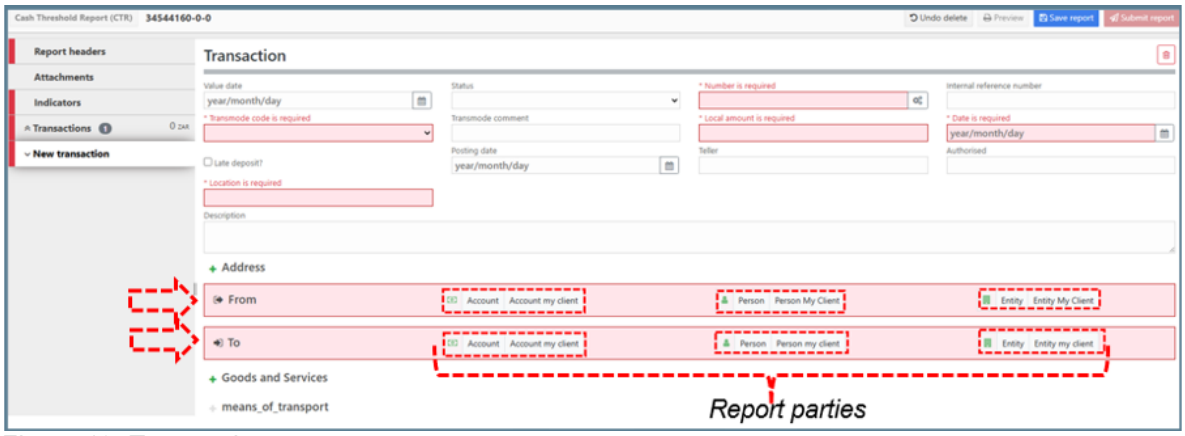

Figure 12: Transactions screen

Transactions form has the following fields:

- Number: Unique transaction number (e.g. bank transaction will be an **Account Number**) / in an event of no transaction numbers being available, users can generate a unique reference number from the system by clicking the icon
- Internal reference number: Reporting entity internal transaction reference number
- Transmode code: Indicate how the transaction was carried out by selecting the relevant code from the drop-down list
- Local amount: The value of the transaction in local currency
- Date: This refers to the date of transaction

- Late Deposit: This field is applicable in cases where the customer drops cash in a box at a bank after the bank's working hours. In all such cases, the "Value Date" will be different from transaction date as the bank will process this transaction the next day
- Teller: The teller who conducted the transaction. This is only applicable where a transaction is conducted in-branch
- Authorised: The person who authorised the transaction
- Location: Refers to the branch or geographical area where the transaction occurred. Please note that this free-text field is currently used to capture transaction location but will be removed in future updates. Reporters are encouraged to start using the structured address fields by clicking the Reporters are encouraged to start using the structured address fields by clicking the "+" icon next to Address to ensure accurate and standardised location reporting
- Description: List additional information in relation to the transaction if available

To capture the details of the involved parties, click report parties (From party, **Person My Client).** The Person My Client form will populate. Complete the Person details as shown in figure 13 below.

BASELINE SCENARIO FIELD E – FROM TYPE / TO TYPE

9.4.2 From type 'Person My Client' Form

Transactional reports on goAML are structured as bi-party transactions with a '**From**' and '**To**' part to every transaction. A transaction report will always have a **'From'** (Payee) and **'To'** (Receiver) side which will need to be completed by the reporter.

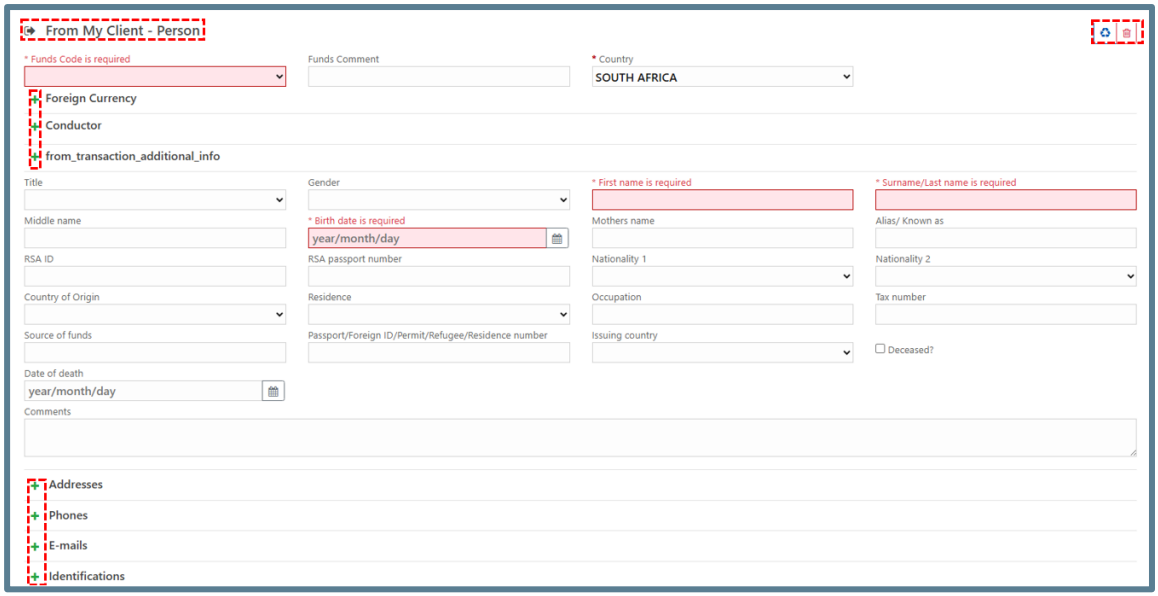

Figure 13: Person My Client form

- All fields marked with an asterisk (*) needs to be completed
- Click on **use existing person icon** to quickly select a previously saved person's details
- **Clicking on delete icon** , will delete all captured person details in the current form
- Click append icon to open additional fields and enter any further transaction-related information that may be required.

The Person **"**My Client" form has the following fields:

- First name: A legal name as reflecting in the identification document
- Surname/Last name: A legal surname as reflecting in the identification document
- Middle name: This is the name that appears between a person's first name and last name.
- Birth date: Date of birth/ can be typed in from calendar in ccyy/mm/dd format (e.g. 1999/02/25)
- RSA ID: 13-digit South African ID Number (e.g. 9902251109876)
- RSA passport number: South African passport number
- Nationality 1: Refers to the first nationality in cases where an individual holds multiple nationalities. It may or may not be the same as the primary nationality.
- Nationality 2: Refers to an additional nationality for individuals who are legally recognised as citizens of more than one country
- Country of origin: The country in which a person is deemed to have originated

- Residence: Refers to the current residence country of the person
- Occupation: This refers to the job title of the person
- Tax number: The tax number of the individual whose details are being captured
- Source of funds: Refers to the origin of the money used in a specific transaction
- Passport/Foreign ID/Permit/Refugee/Residence number: The identification number that is associated with a non-South African natural person
- Issuing country: The country which issued the respective Passport/Foreign ID/Permit/Residence number.

BASELINE SCENARIO FIELD F, G– MY CLIENT / NOT MY CLIENT AND CONDUCTOR

9.4.3 To type 'Entity Not My Client' Form

The Entity Not My Client will populate the form to be completed as shown below in figure 14.

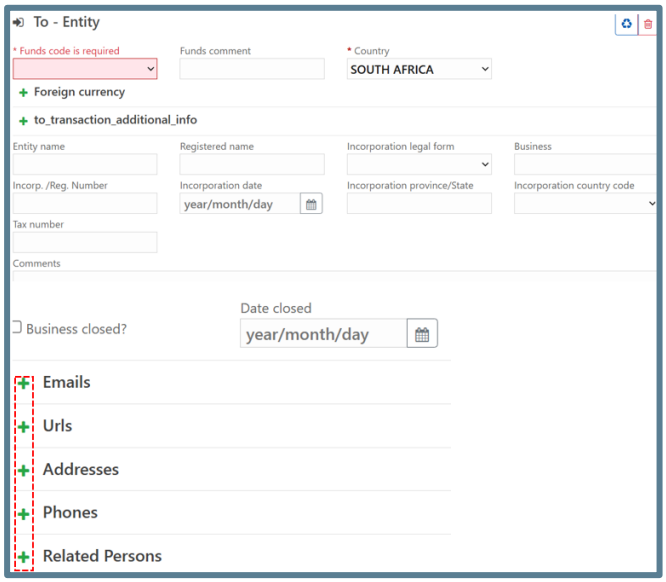

Figure 14: Entity Not My Client form

- **South Africa** is pre-selected as the default country; users can update this field if the country is not South Africa
- The form populates with a single required '**funds code'** field, indicated by an asterisk (*)
- Click append icon to open additional fields and enter any further transaction-related information that may be required
- An account could belong to an entity, and when capturing an entity as 'My Client', it is mandatory to capture at least one director associated with the entity.

The "Entity Not My Client" has the following fields:

- Funds code: Type of funds used in initiating transaction (e.g., Cash)
- Funds comment: Description of the funds code
- Country: Country where the transaction was initiated
- Entity name: Name of the entity involved
- Registered name: The Registered name of the institution (CIPC)
- Incorporation Legal form: The legal form of the entity
- Business: Business area of the entity
- Incorp./Reg.Number: The registration number of the entity / company in the relevant authority (e.g. Chamber of Commerce/ CIPC etc.)
- Incorporation date: Incorporation registration date in ccyy/mm/dd format
- Incorporation province/state: Name of the province/state involved
- Incorporation country code: Incorporation registration country code, select from a list
- Tax number: The entity tax number
- Comments: Any comments related to the transaction
- Business closed: Select the checkbox if the business is closed; leave it blank if the business remains open
- Date closed: If entity is closed, specify the date of closure in ccyy/mm/dd format.

Capturing address fields

To enter address information associated with the transaction, select the append icon to display additional address fields. The address form will populate as shown below in figure 15.

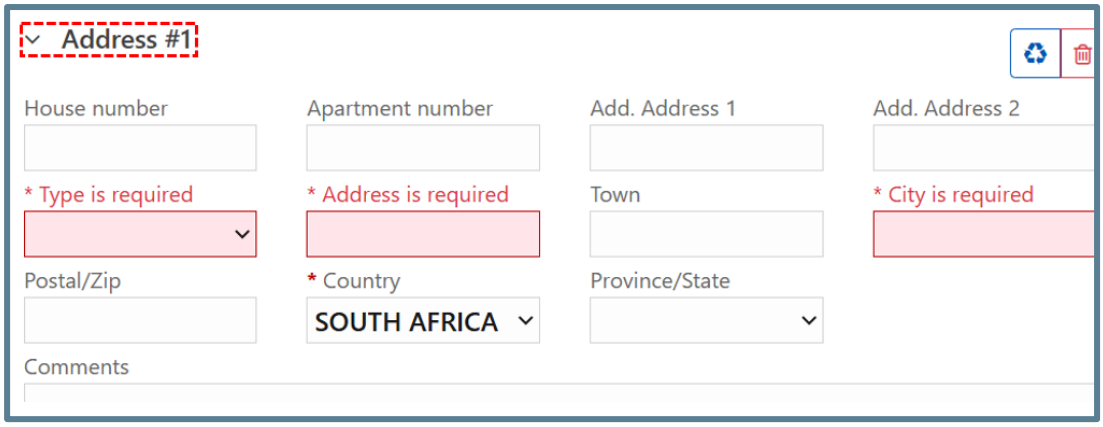

Figure 15: Address form

The “Address” form has the following fields:

- House number: House number associated with the transaction
- Apartment number: Apartment number associated with the transaction
- Address 1: Refers to the location where the transaction occurred, if applicable. Provide **Address 1** only if the transaction took place at that address
- Address 2: Refers to the location where the transaction occurred, if applicable. Provide **Address 1** only if the transaction took place at that address
- Type: Refers to the type of address. Select the type of address from the list
- Address: Physical address associated with the transaction
- City: Name of the city associated with the transaction
- Postal/Zip: Postal code of the city
- Country: Name of the country associated with the transaction
- Province/State: Name of the province where the transaction occurred.

Capturing phone number fields

To enter phones information associated with the transaction, select the append icon to display additional phone fields. The phone form will populate as shown below in figure 16.

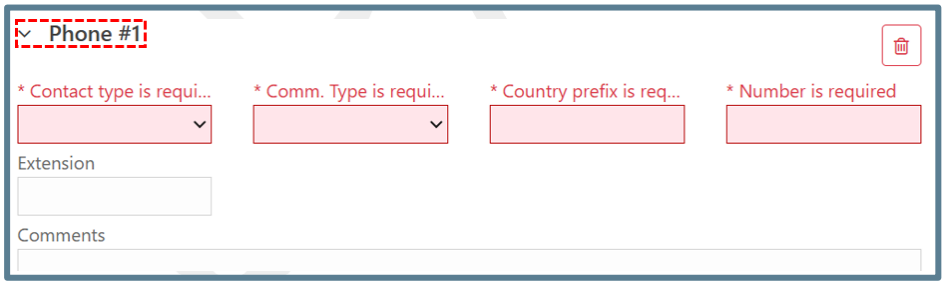

Figure 16: Phones form

The “phone number” form has the following fields:

- Contact type: Type of contact associated with the transaction.
- Comm.Type: The method of communication linked to the transaction
- Country prefix: Country prefix linked to the transaction
- Number: Contact number linked to the transaction
- Extension: Phone number extension linked to the transaction
- Comments: Any comments related to the transaction

9.4.4 From type Account My Client

Account my client will populate the form to be completed as shown below in figure 17.

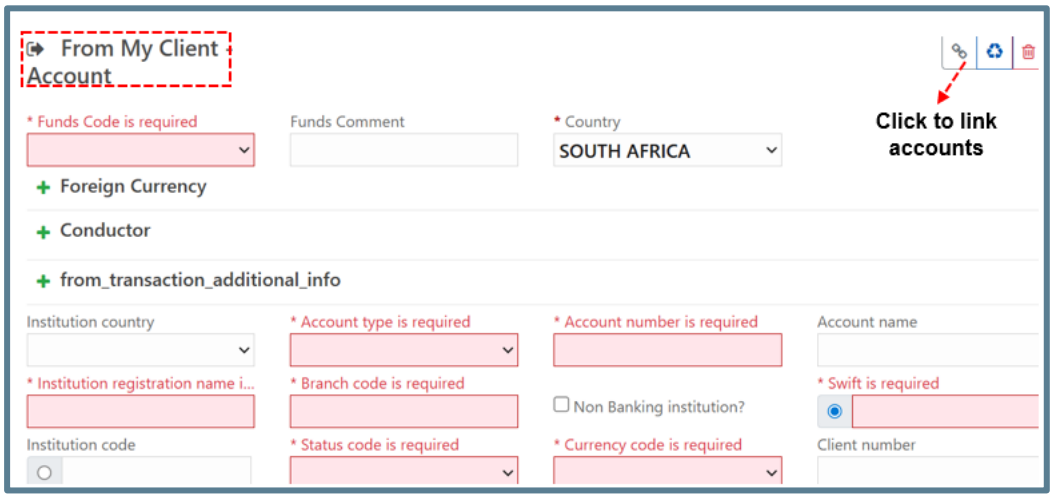

Figure 17: Account form

- Details of related persons must be recorded when the account holder is a client of the accountable institution
- Whenever the involved Account / Person / Entity is the client of the reporting entity, more details may be demanded from the client, and the reporting entity must have the information as part of the adherence to the “Know Your Customer” (KYC) requirements of the FIC Act
- In the instance of an account of a minor both the details of the minor and guardian authorised to transact on his/her behalf should be captured
- For an ‘account my client’, the account must have a signatory.

The “Account” form has the following fields:

- Funds code: Type of funds used in initiating transaction (e.g., Cash)
- Funds comment: Comments if funds code is known

- Country: Country where the account is held
- Institution country: Country where an institution is based or registered.
- Account type: Type of account (e.g. Trust or Client)
- Account number: the bank Account number (for **Non-Banking** institutions the account number can refer to the client number/profile number assigned by the institution)
- Account name: The official name associated with the account, used to identify the account holder or entity
- Institution registration name: Name of the institution where account is held
- Branch code: Branch where the account is held
- Swift: Bank identifier code used to specify a particular bank
- Institution code: Institution identifier code if a Swift code is not available
- Status code: Account status when transaction was initiated (e.g. Active/Closed)
- Currency code: Currency the account is kept in
- Closed: Date account closed if applicable
- Balance: The account balance at the time of reporting
- Date of balance: Date of account balance
- Beneficiary comment: Any remarks or notes regarding the beneficiary
- Comments: Any other comments, if applicable

Related person form

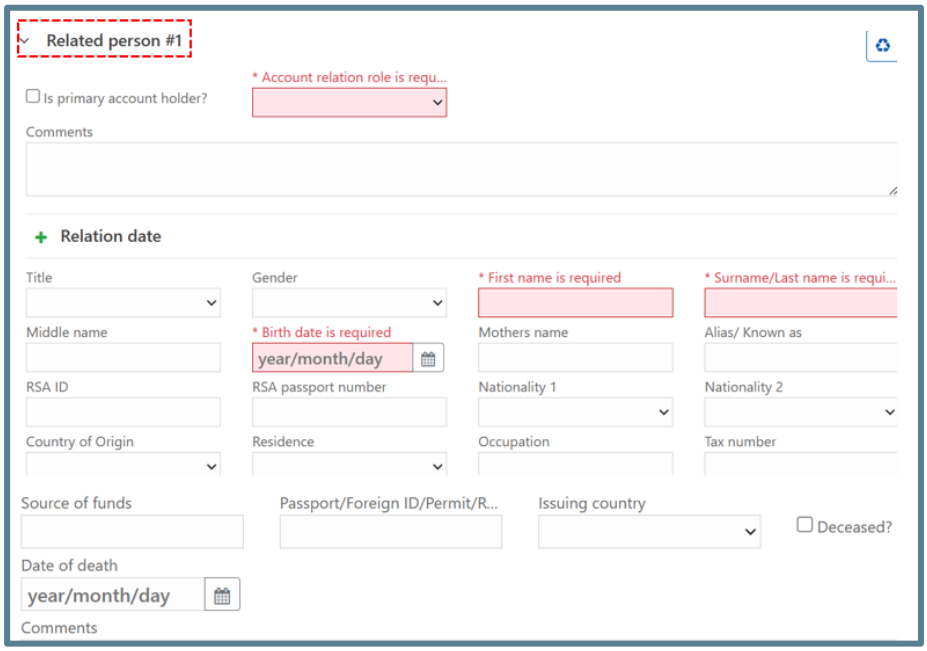

Figure 18: Related person form

The “Related person” form has the following fields:

- Account relation role: The role of the person is in relation to the account

- Comments: Any comments in respect of the related person
- Title: Title of the related person
- Gender: Gender of the related person
- First name: First name of the related person
- Surname/Last name: Surname/Last name of the related person
- Birthdate: Birth date of the related person
- RSA ID: RSA ID of the related person
- RSA passport number: RSA passport number of the related person
- Passport/Foreign ID/Permit/Residence number: Identification number from the related person's official non-South African document
- Issuing country: The country that issued the respective Passport/Foreign ID/Permit/Residence number of the related person
- Occupation: The related person's current occupation or job title
- Tax number: The related person's South African Revenue Service (SARS) tax reference number
- Source of funds: Specifies the origin of the funds used

10. SUBMITTING A CASH THRESHOLD REPORT TO THE FIC

Once all the required details have been provided, the **bar on the left of the tabs** will turn green, to enable the user to submit the form as shown in figure 19.

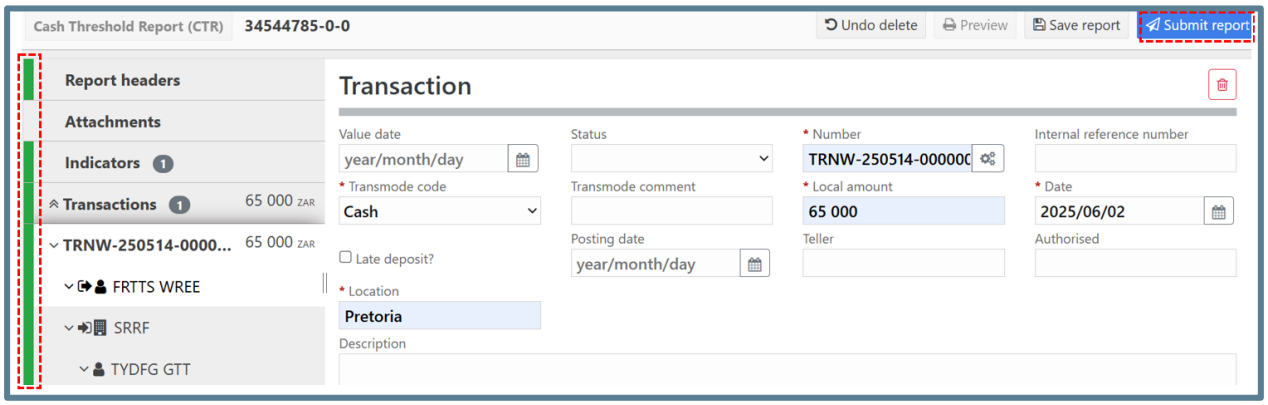

Figure 19: Cash Threshold Report

Click on the **submit report** button. Once the form has been submitted, the pop-up screen will display with the report reference number. The reference number is used for any report related enquiries. A notification e-mail with the refence number will be sent to the user's e-mail address which was entered during the registration process.
